Libreriasautomationstudio

The image displays a screenshot of a CAD software interface, likely SolidWorks, showing a hydraulic schematic diagram. The diagram features a pump (M1) at 250 bar, a reservoir (R1), and three parallel hydraulic cylinders (Cyl1, Cyl2, Cyl3) at 10 bar. The cylinders are connected via 3 mm diameter lines. The schematic is annotated with numbered callouts (1-6) pointing to various components and lines. Two dialog boxes are open over the diagram:

- PDM Link (Check In):** A dialog box for checking in a file. It includes fields for Project ID (Demo ASL- Volo), Revision # (1), Designer, Revision Date (02/04/2011 18:00:00), and a Comment field. Buttons for 'Check In' and 'Cancel' are visible.
- Browse For Folder:** A dialog box for selecting a working directory. It lists several folders under 'Computer', including SYSTEM (C:), DVD Drive (D:), DATA (E:), SSD (F:), pshepley (\\fdcl\user5) (H:), comunun (\\fdcl) (M:), and qualite (\\fdcl) (Q:). Buttons for 'Make New Folder', 'OK', and 'Cancel' are visible.
